WORK EXPERIENCE

Inncircles Technologies   Aug 2023 - present
Product Developer   Hyderabad

– Created multiple reusable shared components using Angular to enhance modularity and maintainability across the website, reducing development time and ensuring consistency.
– Implemented efficient aggregation pipelines to optimize data processing, significantly reducing data fetching times and improving system performance.
– Built custom buttons, forms, and other components for mobile application using React Native, enhancing development efficiency and ensuring a consistent user experience.
– Implemented role-based access control (RBAC) to secure sensitive information, ensuring compliant and secure access through defined user roles and permissions.
– Created a chatbot for the company website using Streamlit and FastAPI, improving user engagement and support through real-time assistance using open-source API keys.

Inncircles Technologies   Mar 2023 - Jul 2023
Full Stack Developer - Intern   Hyderabad

– Enhanced user experience across various devices by developing responsive web designs using Angular and React.
– Assisted in the development of backend APIs using Node.js and Express, contributing to the enhancement of server-side functionality and performance.

AT and T   Jan 2023 - Mar 2023
Technical Intern   Hyderabad

– Acquired proficiency in Git version control while actively participating in the development of code repositories.
– Worked closely with the QA team to identify and resolve bugs, significantly improving the stability and performance of the application.

PROJECTS

Genuine Careers - MongoDb , ExpressJS , ReactJS , NodeJS   Github

– **Objective:** Developed a website to centralize job opportunities for students, addressing the difficulty of finding jobs in one place.
– Designed an intuitive and responsive user interface with ReactJS, enabling seamless navigation and job filtering.
– Implemented a robust backend using Node.js and Express.js to manage job listing data and handle user queries.
– Developed advanced filtering options based on location, job type, and experience.

Co people - MongoDb , ExpressJS , ReactJS , NodeJS   Github

– Co People is a dynamic web application I crafted using React, Node JS. This project is a modern and engaging social platform that allows users to connect, share content and interact seamlessly.
